Installing a SoftPlan Library

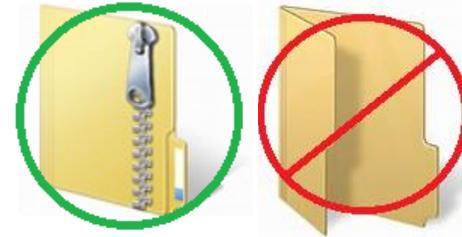

► Click a Library file and "Save" it to your computer

► These files are compressed ZIP files so the folders containing the windows or doors will need to be extracted and saved to your SoftPlan library

  ► Go to the Downloads folder on your computer and click to highlight the file you downloaded (look for the compressed ZIP file icon, not the folder icon)

  ► Right-click to select "Extract All…" from the list of options

  ► Click on the Browse… button of the "Select a Destination and Extract Files"

   dialog box

  ► Find the location of your SoftPlan library

  ► Click to highlight and then hit "OK"

  ► Click Extract to complete the process
