Wood-Ultrex Insert Casement

Unit Features

WOOD-ULTREX INSERT CASEMENT COLLECTION:

Wood-Ultrex Insert Casement: IICA

Wood-Ultrex Insert Awning: IIAWN

Wood-Ultrex Insert Casement Transom: IICATR

Wood-Ultrex Insert Casement Picture: IICAP

Frame and Sash:

- The frame and sash exteriors are made of Ultrex[®], an advanced fiber reinforced material that is resistant to thermal conductance. Ultrex patented coating system meets all the requirements of AAMA 624-10.
 - Exterior colors: Stone White, Pebble Gray, Bronze, Evergreen, Cashmere, or Ebony.
- The interior is non finger-jointed, kiln dried to a moisture content of 6-12% at time of fabrication. Water-repellant, preservative treated in accordance with WDMA I.S.4.
 - Interior wood is available as Pine bare wood or factory-applied White, Clear, and Designer Black interior finish.

Frame:

- Composite frame thickness is 1 13/16" (46). Frame Width of 3 1/4" (83). Ultrex is .080" (2) thick. Includes an exterior accessory kerf and snap-in wood sill liner.

Sash:

- Composite sash thickness is 1 17/32" (39). Ultrex is 0.070" (2) thick. Sash can be replaced but not reglazed.

Casement Hardware:

- Dual arm roto hardware factory installed on casement units. The roto gear hardware is an E-coated, high strength, low alloy steel. IO width less than or equal to 24 3/8" (619) require dyad operators.
- The hinge track is stainless steel, the hinge arm is E-coated high strength, low alloy steel and the hinge shoe is an injection molded with a stainless steel insert.
- Egress hinge is required on units with an I.O. from 26 1/2" (673) to 29 23/64" (746) to meet egress code. This hinge does not allow for cleaning of the exterior of sash from the inside.
- Folding handle with removable snap fit covers are available in Almond Frost, White, or Matte Black finishes.
- Optional Brass, Satin Nickel, and Oil Rubbed Bronze hardware available. Sequential locks are used on all heights, with removable escutcheon and handle.
- Optional coastal hardware is available.
- Optional factory applied Window Opening Control Device is available (min size: 17 27/32" (453) x 24" (610) - max size: 36" (914) x 71 1/8" (1807)). Available in almond frost, white, and Matte Black finishes.

Awning Hardware:

- Scissors arm roto hardware factory installed on all awning units. The Roto hardware is an E-coated high strength, low alloy steel.
- The hinge track and hinge arms are E-coated high strength, low alloy steel, and injected molded with a stainless steel insert.
- Folding handle with removable snap fit covers are available in Almond Frost, White, or Matte Black finishes.
- Optional Brass, Satin Nickel and Oil Rubbed Bronze hardware available.
- A single point lock on each jamb/stile, with a removable escutcheon handle.
- Optional coastal hardware is available.
- Optional factory installed or field applied stainless steel sash limiter is available.

Wood-Ultrex Insert Casement

Unit Features Continued

Installation:

- Operator: Secure the jambs with minimum of two #8 x 3" pan head screws. Maximum spacing of jambs not to exceed 25.875". Secure the head jamb with two #8 x 3" pan head screws. Maximum spacing of head jambs not to exceed 30.875".
- Picture: Secure the jambs with minimum of one #8 x 3" pan head screws. Maximum spacing of jambs not to exceed 20". Secure the head jamb with minimum of one #8 x 3" pan head screws. Maximum spacing of head jambs not to exceed 17.250".

Glazing:

- Dual-pane units are manufactured with an 11/16" (17) IG with Low E1, E2, E3, E3/ERS, or no coating including argon gas fill.
- Tempered glass and/or obscure glass, and California Fire glass (annealed exterior and tempered interior glazing configuration) are available as an option.
- All glass is of a select quality complying with ASTM C 1036.
- Insulating glass is manufactured and tested to pass level ASTM E 2190 and is IGCC certified.
- The glazing seal is a silicone bedding on the exterior surface and vinyl glazing seal on the interior surface in a one-piece sash.
- STC/OITC values are available in accordance with ASTM E90-09. See the Product Performance chapter for values.
- Decorative glass options include glue chip, rain, reed, narrow reed, frost, and tinted (bronze, gray or green). Decorative glass is not available with Low E1, Low E3/ERS, or STC/OITC.

Weather Strip:

- All units are dual weather stripped.
- The primary weather strip is a black extruded PVC foam filled bulb that attaches to all four sides of the frame by a kerf in the Ultrex. It provides a seal between the wood and the sash and the frame Ultrex.
- The secondary weather strip is a black extruded PVC hollow that is attached to the sash and provides a seal between the sash Ultrex and frame Ultrex.

Insect Screen:

- Charcoal fiberglass (non-corrosive) screen cloth.
- Roll formed aluminum frame with corner key construction
 - Available in Almond Frost, Ebony or White.
- Optional wood veneer screen available.
- Spring loaded pins for installation.

Interior / Exterior Simulated Divided Lites (SDL/SDLS):

- Interior bar: 7/8", (22) wide bars. Pine bare wood, or white, clear, or designer black interior finishes.
- Exterior bar: Ultrex, 7/8", (22) wide bars, finish to match exterior.
- Patterns available: rectangle, 6 or 9 lite Prairie cut or Cottage style cut.
- Simulated check rail option: 2 11/32", (60).
- Pattern available: simulated rail in standard center or customer specified location with 7/8", (22) pattern above, below or both in pattern of rectangular equal lite or prairie lite cut.
- SDL not available on rain, reed or narrow reed decorative glass. Glue chip requires tempered glass for SDL application.
- Available on tinted glass without spacer bar.

Grilles-Between-The-Glass (GBG):

- 23/32" (18) contoured aluminum bar placed between two panes of glass
- Patterns: Rectangular, 6 or 9 lite Prairie cut, or Cottage style
- Exterior colors: Stone White, Pebble Gray, Bronze, Evergreen, Cashmere, or Ebony
- Interior colors: Stone White, Bronze, or Ebony (matches unit interior color)
- GBG is not available with tinted glass.

Removable Interior Grilles:

- Bar: Pine wood, 3/4" (19)
- Pattern: Standard rectangular pattern.
- Available in Pine bare wood or factory applied white, clear, or designer black finishes.

Measurement Conversions - Field Measurement

Conversion from Field Measurement to Frame OM		
Width		
Condition	Formula	
If blind stop width is 1/2 inch or less	IICA frame OM width = inside opening width - 0.375 (10)	
Height		
Condition	Type of Sill	Formula
If old sill angle is less than 8 degrees	0 degree bottom sill	IICA frame OM height = inside opening height - 0.250 (6)

Wood-Ultrex Insert Casement

Mulling Guidelines

Multiple assemblies can be factory mullered up to 4 units wide by 1 unit high

MAXIMUM INSIDE OPENING not to exceed 112" (2845) x 71 1/8" (1742)

Multiple assemblies can be factory mullered up to 1 unit wide by 2 units high

MAXIMUM INSIDE OPENING not to exceed 72" (1829) x 94 1/4" (2394):

NOTE: Field mulling beyond the above limitations is not recommended

CALCULATING TOTAL INSIDE OPENING FOR ASSEMBLIES

WIDTH: ADD Frame Widths + 3/8" (10)

HEIGHT: ADD Frame Heights + 1/4" (6)

Tolerance = 3/16" (10) from Frame to Inside Opening at left and right jamb.

Conversions Formula:

$$\frac{\text{Total DLO} - \text{Total Bar Width}}{\text{Number of lites}} = \text{Individual DLO}$$

NOTES:

- Wood Grilles for special size units will default to the next smaller standard size lite pattern. Wood Grilles are not available in lite patterns other than the Wood Grille patterns.
- Rectangle GBGs for special size units will default to the next smaller standard size lite pattern. Also available will be Prairie pattern and customer specified equal rectangular lite patterns.
- Rectangular SDL for special size units will default to the next smaller standard size lite pattern. Also available will be Prairie patterns, Cottage patterns, and customer specified equal rectangular lite patterns.
- Prairie GBGs and SDL are not available in lite patterns other than the Prairie patterns listed in the following pages
- Cottage SDL for special sizes will default to the next smaller standard size lite pattern. Cottage SDL is not available in lite patterns other than the Cottage patterns listed in the following pages.
- Maximum number of lites wide and high for equal lite SDL is 11 lites.
- Minimum DLO measurement for equal lite GBG and SDL option is 3" (76) and will be validated by OMS.
- Standard DLO measurement for Prairie GBG and SDL option is 4" (102) Special DLO corners are n/a.
- Standard DLO height measurement for Cottage SDL option is 10" (254). Special DLO heights are n/a.
- Simulated Rail: Rectangular, Prairie 6-Lite and 9-Lite SDL patterns are available with Simulated Rail.
- Simulated Rail: custom ratio and specified DLO are available with Simulated Rail and will be validated by OMS.
