ABSTRACT: The following instruction details the application of pile weather strip on a half screen for an Integrity Wood-Ultrex Double Hung unit.

NOTE: Numbers listed in parentheses ( ) are metric equivalents in millimeters rounded to the nearest whole number.

1. Cut pile weather strip equal to width of screen. See figure 1.

2. Remove paper backing from pile weather strip and apply to the interior top rail of the screen, starting flush at the end of the screen and aligned with the top. See figure 2.

3. Trim the pile to 1/8" (3) tall, 3/8" (10) from the edges of the screen. See figure 3.
