WOOD-ULTREX

RESIDENTIAL

CONTEMPORARY

NEWTON CUSTOM HOME

SITUATION OVERVIEW

For their new home, the owners wanted to create spacious, low-maintenance, single-story living with a contemporary feel. The custom-designed home needed to showcase clean lines, natural light and large open spaces to house the homeowner's collection of paintings and sculptures. In addition, the owners wanted to bring the outside view into the home, which was key for them to integrate the house with the beautiful landscaping.

INTEGRITY SOLUTION

Integrity Wood-Ultrex® Casement, Awning and Inswing French Doors, with an Ebony exterior finish, met the design, aesthetics and energy requirements needed for this project. In fact, Integrity windows and doors are proven to save on heating and cooling costs for years to come. And in keeping with the modern look, the Integrity windows and doors – with sleek narrow profiles and clean sight lines–helped incorporate large openings and glazing areas to enhance the outside view and provide maximum daylight to showcase the artwork throughout the home.

Integrity Wood-Ultrex windows and doors are built tougher, last longer and protect better.

- Integrity windows are ENERGY STAR® qualified, which can save 7-15% of the total energy bill*.
- The Ultrex patented finish is the *first and only* to be AAMA verified 624-10: The industry's best fiberglass finish resists fading, chalking, scratching and cracking to keep a project looking good for years, even in dark colors.
- Contemporary styling means that Integrity builds products for expansive views, maximum light and clean lines with narrow profiles to offer design flexibility for a sleek, modern look.
- Integrity was born from The Marvin Companies' century-long heritage of service, innovation, craftsmanship, quality and value with a focus on all-out performance.
