What You Need to Know About Window + Door Replacement

1

Evaluate
How do you know when windows and doors need replacing?

2

Select
Choose the right style and materials for your home.

3

Consult
Know how your products will be installed and who will install them.

4

Installation
What to expect before, during, and after installation.

5

Safeguard
Get all the details on your warranty coverage.

1. Evaluate

Seeing the Signs

First things first: is it really time for replacement? Here, we'll help you make the call and show you the added benefits of new windows and doors. Ask a contractor or Marvin dealer to help you evaluate.

Replacement 101: The Signs

IN THE CLEAR	WARNING	IMMEDIATE ATTENTION
Condensation Perfectly normal. Condensation (including frosting) simply indicates the presence of humidity and means your windows or doors are effectively holding heat inside your home.	**Faulty Operation** Difficulty opening or closing, sticking sash, and pesky operational issues can sometimes be solved with a thorough cleaning or small repair. However, these can also be signs that parts are nearing the end of their lifespan. Best to investigate.	**Water Damage** Water between glass panes, leaking, water stains, or evidence of wood rot can be signs that excess moisture is accumulating where you cannot see it. This can lead to mold, mildew, warping, structural damage, and often the need for replacement.
Surface Wear Cosmetic damage like chipped paint, tarnished hardware, and dirty weatherstripping can be addressed with proper care and maintenance. No need to replace.	**Climate Control** New windows and doors can get rid of drafts and inconsistent temperatures to make rooms more comfortable. But if the time isn't right, replacement can wait.	**Safety** As entry points into your home, you should address broken windows or doors immediately. This also gives you the opportunity to implement home automation technology.

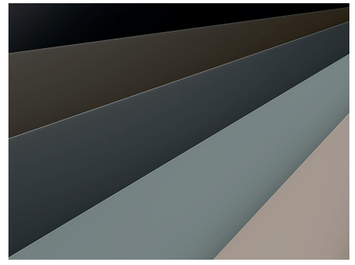

2. Select

Consider Your Materials

Marvin offers three distinct material types, each with their own unique qualities.

Materials Available

WOOD	EXTRUDED ALUMINUM	ULTREX FIBERGLASS
		
Nothing beats the beauty or the versatility of our wood windows and doors. Choose from a selection of species available as both an interior or exterior material.	We clad the exterior of our Ultimate wood windows and doors with a tough and durable extruded aluminum featuring a commercial grade finish designed to stand up to the elements and maintain its beauty.	Ultrex® fiberglass is a proprietary fiberglass from Marvin that's incredibly durable and low maintenance, with an industry-leading finish that performs in even the harshest environments.

3. Consult

Finalizing the Details

Here's what you should know and expect as you get ready to place your order and plan for your installation.

What Type of Replacement Do I Need?

INSERT REPLACEMENTS	FULL-FRAME REPLACEMENTS
Allow new windows to be installed within the existing frame after old sash, hardware, and covers are removed.	Require existing windows to be completely removed down to the studs, and then new windows are installed in the opening.
– Also known as frame-in-frame or a pocket window	– Allows for inspection and repair of concerns like water damage
– An option for structurally sound wood or aluminum frames	– Necessary for vinyl or damaged frames and often for remodel
– Preserves existing interior and exterior trim	– Requires removal of interior and exterior trim and occasionally siding
– Less extensive installation and typically lower cost	– More extensive installation and typically higher cost

Common Questions

Who Is My Installer?

You may choose to work with an Authorized Installing Retailer who handles both product ordering and installation. Marvin Authorized Replacement Contractors are specially trained by Marvin and work with a dealer on your behalf to manage your order and installation.

Your dealer can also help you find a trusted independent contractor. Prefer to work with your own contractor? He or she can partner with any independent Marvin dealer to manage the details of your order.

Helpful Tips

If you're prepared for these common scenarios, they won't catch you off guard.

Permits

Usually required by local codes for both replacement and remodeling work. Confirm that your installer will manage these.

Lead Paint

Occasionally found in older homes. If detected, your installer will take extra precautions to manage and dispose of materials safely.

Hidden Damage

Removing existing windows and doors may reveal structural damage in walls or frames. If so, this gives you the opportunity to address and stop the cause.

4. Installation

Finalizing the Details

It's finally happening. Prepare your space and get ready for what's ahead.

Installation 101

EARLY PLANNING	INSTALLATION DAY	POST INSTALLATION
Planning One to two weeks before, make a plan to see who will be home during the installation and how you'll keep pets and little ones safely away. Confirm the date and time with your dealer.	**Walk-Through** Take time to do a walk-through to point out anything crews need to be mindful of, such as special landscaping elements or delicate furniture.	**Double-Check** Before crews leave, ensure you are satisfied with their clean-up. Afterwards, walk through the areas again and make a punch list of anything that needs attention, like paint touch-ups or any product issues.
Preparing Areas To give crews access – furniture, rugs, and décor (including curtains and blinds) will need to be cleared from the replacement work area. Discuss with your installer if this is a service covered in your costs.	**Day-Of Details** Make sure to disarm any security systems before crews begin working.	**Follow Up** Discuss any inspections that will need to be done to fulfill permit requirements. Evaluate your punch list and work with your installer to have these items addressed.

5. Safeguard

Understanding Your Warranty

When choosing a manufacturer for your project, consider their warranty coverage. Note whether the warranty is transferable or not, the components it covers, and for what length of time. We are proud to offer a fully transferable comprehensive warranty. A summary of our warranty is provided here to assist as you evaluate replacement window and door options for your home. Our warranty applies to Marvin products. Your installer will confirm details of how they warranty their installation services. Full warranty details, including special notes for homes in coastal environments, are available at marvin.com/support/warranty.

Marvin Warranty Summary

PRODUCT	COVERS	PERIOD
Exterior Finish Ultimate	Manufacturing defects resulting in chalk, fade, and loss of adhesion (peel)	20 Years
Exterior Finish Vivid, Elevate, Essential	Manufacturing defects resulting in chalk, fade, and loss of adhesion (peel)	10 Years
Insulating Glass Seal Ultimate, Vivid, Elevate, Essential	Seal failure for most glass sizes caused by manufacturing defects and resulting in visible obstruction through the glass	20 Years
Glass Ultimate, Vivid, Elevate, Essential	Stress cracks caused by manufacturing defects in non-tempered glass	10 Years
