ELEVATE®
COLLECTION

The Perfect Balance of Beauty and Strength

Balancing beautiful design with superior strength, the Marvin Elevate collection delivers style in any climate. Elevate features warm wood interiors that can blend in or stand out with Ultrex® fiberglass exteriors for lasting durability. The collection offers a range of carefully selected features and options, making it as versatile as it is elegant.

LONG-LASTING STRENGTH + BEAUTY

DURABLE FINISHES

CURATED CHOICES

CASEMENT WINDOWS
Gunmetal

Ultrex Fiberglass Exteriors

Ultrex® fiberglass is a unique, proprietary material that significantly outlasts and outperforms vinyl and vinyl/wood composite materials while offering unmatched durability and timeless style. This state-of-the-art material was developed by Marvin and is featured on the exteriors of the Marvin Elevate® collection.

Marvin uses Ultrex fiberglass because the material you choose for your windows matters. Ultrex is strong, stable, has a durable acrylic finish, and is energy efficient.

Strength

The strength of Ultrex fiberglass translates into long-term ease of operation, minimal maintenance, and superior performance.

Stability

By expanding and contracting at nearly the same rate as glass, Marvin windows and doors made with Ultrex fiberglass are more resistant to leaks and seal failures.

Finish

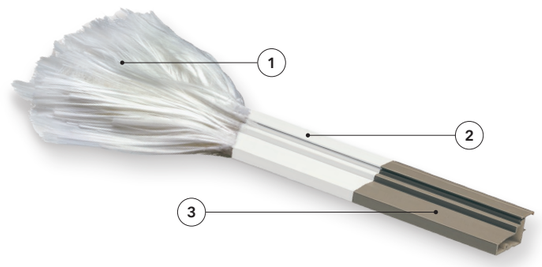

The proprietary acrylic finish is 3x thicker than competitive painted options, and resistant to chipping, chalking, or fading.

Energy Efficiency

Ultrex fiberglass combined with energy-efficient glass options can help manage the amount of light and heat entering and leaving your home.

How It's Made

Ultrex fiberglass is a composite material made of fine glass fibers woven into a cloth then bonded together with a formulated polyester resin. The continuous strands of fiberglass give Ultrex its strength in resisting breakage.

1

Raw Fiberglass Strands
Thin strands of strong glass cables are saturated with specifically compounded resins.

2

Pultruded Fiberglass
The strands are pulled through a heated die and cut with diamond-edged blades to form Ultrex fiberglass.

3

Proprietary Acrylic Finish
A proprietary acrylic finish is then applied; it's smoother and 3x thicker than other brands.

Strength Matters

Ultrex fiberglass is 8x stronger than vinyl and has a low thermal expansion rate. It is heat resistant, non-corrosive, and has low conductivity.

Ultrex fiberglass bends and flexes less than vinyl. This helps maintain the window seals and operation year after year.

The strength of Ultrex fiberglass allows for a reduced frame thickness that supports more visible glass, creating a larger view.

Durable material weathers better against everyday wear and stands the test of time.

ULTREX FIBERGLASS IS

8x
stronger than vinyl

3x
stronger than Fibrex®

More Glass, More Value

This resistance to bending means we can reduce the frame thickness without impacting the window's structural integrity. This allows for more glass, expansive views and daylight openings, and less window frame.

Ultrex fiberglass provides larger views

Thicker vinyl profiles can restrict views

Stability You Can Count On

Constant expansion and contraction can gradually break down windows and doors, causing leaky seals, poor operation, and loss of structural integrity.

Ultrex® fiberglass expands and contracts at virtually the same rate as glass, so Marvin Elevate® windows and doors stay tight and true over time, resisting air leaks, seal failures, and stress cracks that can compromise energy efficiency and long-term performance.

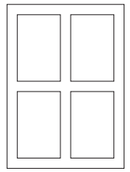

This low rate of expansion and contraction also allows windows and doors to open and close on demand without sticking or binding from swelling, warping, material distortion, or deformation from the heat.

ULTREX FIBERGLASS HAS

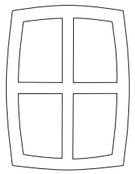

75%
less expansion than Fibrex®

87%
less expansion than vinyl

IN EXTREME WEATHER CONDITIONS

Ultrex fiberglass
stays true

Vinyl
can expand

A Long-Term Finish

Marvin Ultrex fiberglass finish is verified to the American Architectural Manufacturers Association (AAMA) 624 specification. Achieving AAMA 624 verification means that our finish has passed rigorous tests that simulate the harsh conditions encountered throughout the life of a window or door.

Ultrex fiberglass uses an acrylic finish that is paintable, fade resistant, and virtually maintenance free. With a finish that's 3x thicker than competitive painted options, it resists chipping, denting, and peeling.

Lasting Performance

Proprietary Ultrex fiberglass finish resists scratches, chalking, and fading—even in dark colors

Exteriors can be painted to match any home

Virtually maintenance free—no sanding, scraping, or painting care needed

Finish is 3x thicker than competitive painted options

Energy Efficiency

The low thermal conductivity and superior performance of Ultrex fiberglass combine with a selection of energy-efficient glazing (glass) options that help manage the amount of light and heat entering and leaving your home.

Top-Rated Efficiency

Windows and doors with low conductivity reduce heat loss in homes, which translates to lower energy bills.* Ultrex fiberglass provides an insulated barrier against extreme weather temperatures, keeping homes comfortable and reducing heating and cooling costs.

Energy Savings

Low-E glass coatings are designed to reflect heat, keeping homes cooler in the summer and warmer on winter nights while also blocking harmful UV rays and reducing energy costs.

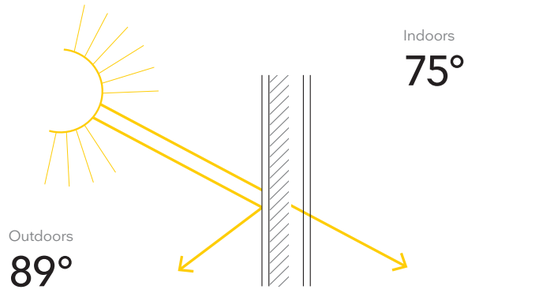

Low-E coatings have three main functions:

Insulation (energy efficiency)
By reflecting heat, the coating significantly reduces solar heat gain in summer and heat loss in winter, helping to maintain a stable indoor temperature.

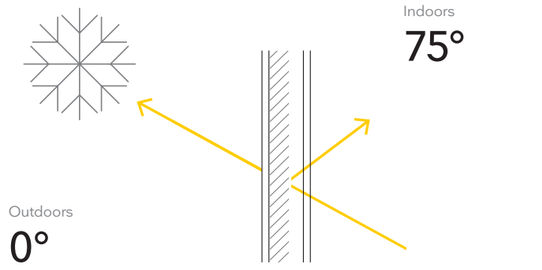

Solar Control (heat gain reduction)
In warm weather, the coating reflects short-wave infrared energy from the sun away from the building, which helps keep indoor spaces cooler by blocking solar heat gain.

UV Protection (reduces UV damage)
The coating reduces a significant percentage of harmful UV rays, helping prevent fading of furniture, rugs, and other interiors.

SUMMER DAY — LOW-E GLAZING

WINTER NIGHT — LOW-E GLAZING

* Replacing old windows with ENERGY STAR certified windows lowers household energy bills by an average of up to 13% nationwide when replacing single-pane windows. Lower energy consumption also reduces greenhouse gas emissions from power plants and homes.

AWNING, CASEMENT,
DIRECT GLAZE WINDOWS
Gunmetal

Casement

The Marvin Elevate® Casement window is side hinged and built for smooth operation with a concealed multi-point locking system. Casement windows create a tight seal on all four sides, meaning fewer opportunities for air leaks.

fig. 3

fig. 4

FEATURES

- Offers traditional style and durability with a low-maintenance Ultrex® fiberglass exterior and warm wood interior
- Available in standard sizes up to 3' wide by 6' high
- Multi-point sequential locking system provides superior PG50 performance rating with single lever operation
- Coordinating picture and transom windows also available
- Narrow frame option with 3-¼" insert replacement frame, flat sill, and through-jamb installation
- Folding handle neatly stows out of the way; stainless steel coastal hardware available
- Interior screen features an aluminum surround and concealed pressure mounting points for ease of operation and enhanced aesthetics
- Available with Hurricane Impact Zone 3 (IZ3) protection (excludes narrow frame option)

Awning

Bring fresh air into hard-to-reach areas, such as over a sink or counter, with the Marvin Elevate® Awning window. Awning windows open outward from the bottom, bringing in ventilation while shielding your interior spaces from rain.

FOLDING HANDLE

Available on Casement and Awning windows

Door Handles

Door handles for the Marvin Elevate® collection are available in two distinct hardware collections.

CAMBRIDGE

NORTHFIELD

Available keyed-alike option (use one key on multiple locks, with up to three different keys on each project).

Choose a distinct interior and exterior handle finish that matches or complements the interior and exterior color of your door.

HARDWARE FINISH OPTIONS

OIL RUBBED BRONZE (PVD)

SATIN NICKEL (PVD)

BRASS (PVD)

MATTE BLACK

ALMOND FROST

WHITE

PVD FINISHES

The Physical Vapor Deposition (PVD) process adds a layer of toughness to hardware exposed to environmental factors like direct sun and humidity. PVD finishes resist fading and discoloration, even in coastal areas. PVD has the highest grade corrosion-resistant finish. PVD finish is available on exterior door hardware in Oil Rubbed Bronze, Satin Nickel, and Brass.

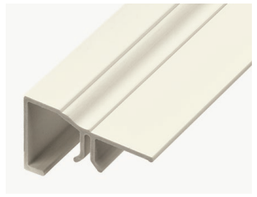

* For more options, visit marvin.com

Exterior Trim Options

Ultrex® fiberglass exterior trim is offered with all Marvin Elevate products in all finish colors. The durability, performance, and look of windows and doors can be extended to the trim. Multiple configurations are available in lineal lengths and factory pre-cut kits in all six Elevate exterior colors.

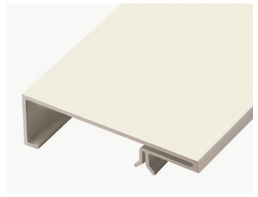

EXTERIOR TRIM OPTIONS

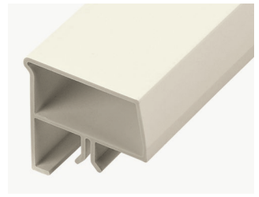

Brick Mould

2" Brick Mould is available with or without 2-⅛" sill nosing.

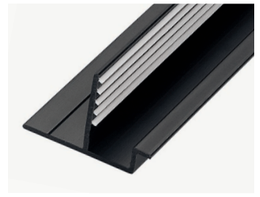

Flat Trim

3-½" Flat Trim is available in Flat and Flat Ranch configurations with or without 2-⅛" sill nosing.

Sill Nose

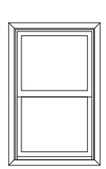

2-⅛" Sill Nose provides authentic sill appearance.

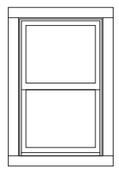

Connection Barb

Barb and receiver attachment method provides for quick, secure installation.

IZ3 Products for Coastal Living

Marvin Elevate® IZ3 Certified products are specifically designed for the extreme conditions and construction requirements of coastal areas. Rigorously tested by third-party agencies to meet or exceed the most stringent coastal codes, they protect against flying debris, driving rain, cyclic pressure, and extreme temperatures. The Ultrex® fiberglass finish meets AAMA 624 standards for weathering and fading resistance.

Simple and Efficient Installation

Marvin Elevate windows and doors bring together design, quality, and performance in one streamlined collection. Elevate products offer a number of installation options and accessories that make it easy to meet project demands.

Nailing Fin

Pre-attached folding nailing fin and drip cap for easier installation.

Through-Jamb

Available through-jamb and installation bracket options.

Factory-Applied Jamb Extensions

Factory-applied jamb extensions save time and labor. We supply 4-⅝", 6-⅝", and 6-¹³⁄₁₆" jamb depth in bare pine, clear coat finish, painted White, or painted Designer Black.

Paintable Exteriors

Ultrex fiberglass exteriors are paintable, and they hold color better than vinyl or vinyl/wood composites.

Factory-Installed Screens

Factory-installed screens are a standard offering with operating windows. At no extra cost, we can ship your screens separately to reduce on-site damage prior to installation.

Factory-Mulled Assemblies

Available standard factory mulling, reinforced factory mulling, or field mulling kits. The reinforced mull meets **AAMA 450 specifications** and performs up to PG50 on standard products and up to PG55 on IZ3 rated products.

Corner Keys

Integral corner keys keep window and door units square and corners sealed.

Custom Sizes

Custom sizes are available on windows and doors in ¹⁄₆₄" increments for the perfect fit every time.

Pine, Custom Finish

MARVIN®

Since 1912, Marvin has been a family-owned and -led company, with a legacy of innovation and commitment to the highest quality. We understand the unique opportunity windows and doors have to improve our spaces and how we feel in them. That's why we never stop pushing what's possible and inventing new solutions to channel fresh air, enhance light quality, and connect with the world around us.
